

Bergenfield Health Department offers flu vaccination

Friday, 13 November 2015 09:01

The flu season will closely be approaching us. The Quadvalent Flu vaccine is now available for area residents from the Bergenfield Health Department. Vaccination is administered in the Health Department's Community Health Rooms located at 198 N. Washington Avenue by a public health nurse. Ages 6 months through adulthood can schedule a vaccination. There is a \$15 administration fee for the vaccination. A home visit by a public health nurse can be scheduled as well for the home bound at no extra cost. Children attending preschool in New Jersey are required to receive a flu vaccination to remain in school this winter season. Pregnant women and those who have chronic health conditions are more at risk from complications of flu like illnesses. Please contact the Bergenfield Health Department at 201-387-4055 option 5 to arrange for your vaccination.
